Inspections Unit conducted a Semi-Annual Audit of Overtime usage for the period of July 1, 2015, through December 31, 2015. This audit included the following units: All District's, District Investigative Units, Neighborhood Liaison Units, and VCS Units. These overtime amounts include the following categories: events, investigations, late radio runs, meetings, personnel shortages, recalls, and reports.

Inspections Unit recommends this form be routed through the respective bureaus to the affected districts, sections, or units for review, further analysis, and to solicit recommendations to reduce or minimize overtime usage.

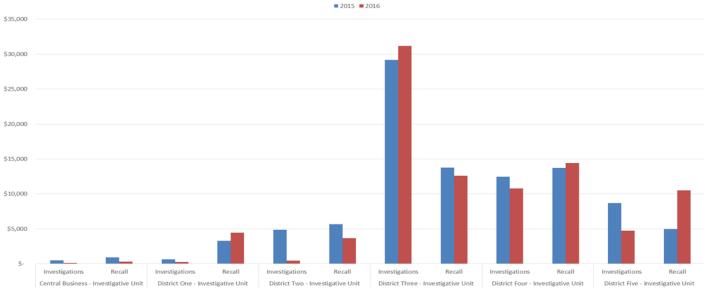

- 1. **Shift Schedules**: Things to consider are how long the schedule has been in place? Do the employees like the schedule? Is the schedule meeting operational demands?
- 2. **Match Staff Level with Work Demand:** The second area of consideration is matching staffing levels with work demand: Does the work demand fluctuate over the course of a day or week? If so, then looking at staffing adjustments per shift may offer operational improvements.
- Monitor Absenteeism: Closely monitor absenteeism, high absenteeism levels can increase overtime
 levels as employees are required to cover extra shifts and can increase stress and fatigue. 25% of
 absences are due to stress and feelings of entitlement.
- **4. Cross-Training:** When only a small percentage of a workforce is capable of completing a specific task, overtime distribution can be greatly skewed. Cross-training officers allows for overtime reduction and the work to be more evenly distributed.
- 5. Personnel Shortages: A lot of overtime occurs when districts and shifts are understaffed for various reasons such a transfers, promotions, etc.

The Inspections Unit believes the following categories: events, investigations, late radio runs, meetings, personnel shortages, recalls, and reports, represents the majority of incremental overtime usage and understands that all amounts may not have been captured for various reasons, such as coding issues on 68P's and interpretations from one time keeper to the next based on the reason indicated on the individual 68P.
